

Project 2 – UI/UX Design

Mood Poll Website + Quizzify Mini Quiz Game

Presentation By – Sanskruti Jagdale

Project Overview

Mood Poll Website

An interactive platform that captures users' emotional states through an intuitive emoji-based interface. Features personalized follow-up questions and real-time mood tracking with visual analytics.

Quizzify Mini Game

A sleek, engaging quiz experience designed with modern UI principles. Clean navigation, instant feedback, and a rewarding user journey that keeps players coming back.

Daily Report – 15th November

Sanskruti

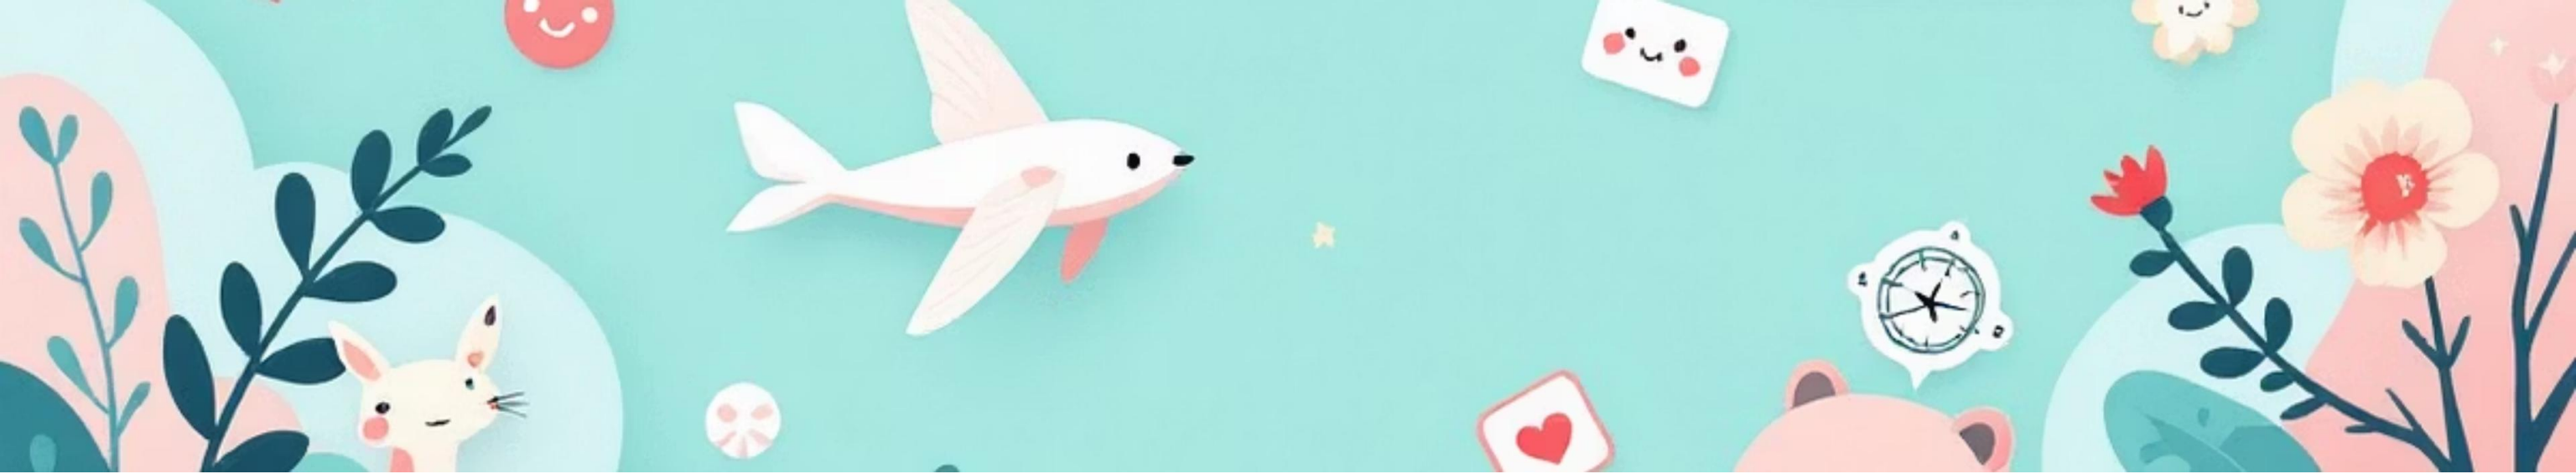

Established the complete visual identity for the Mood Poll, including color palette selection, layout structure, and percentage display formatting for mood analytics.

Vaibhav

Designed the core Mood Poll interface featuring four distinct emoji options: Happy, Sad, Angry, and Tired, ensuring optimal spacing and touch targets.

Mihir

Developed personalized follow-up question flows for each mood state, creating a more empathetic and engaging user experience.

Daily Report – 16th November

Significant progress on visual assets and strategic planning for the next phase of development.

Asset Delivery

Sanskriti finalized and submitted background designs and mood sticker assets to Sanjay for implementation review.

Timeline Set

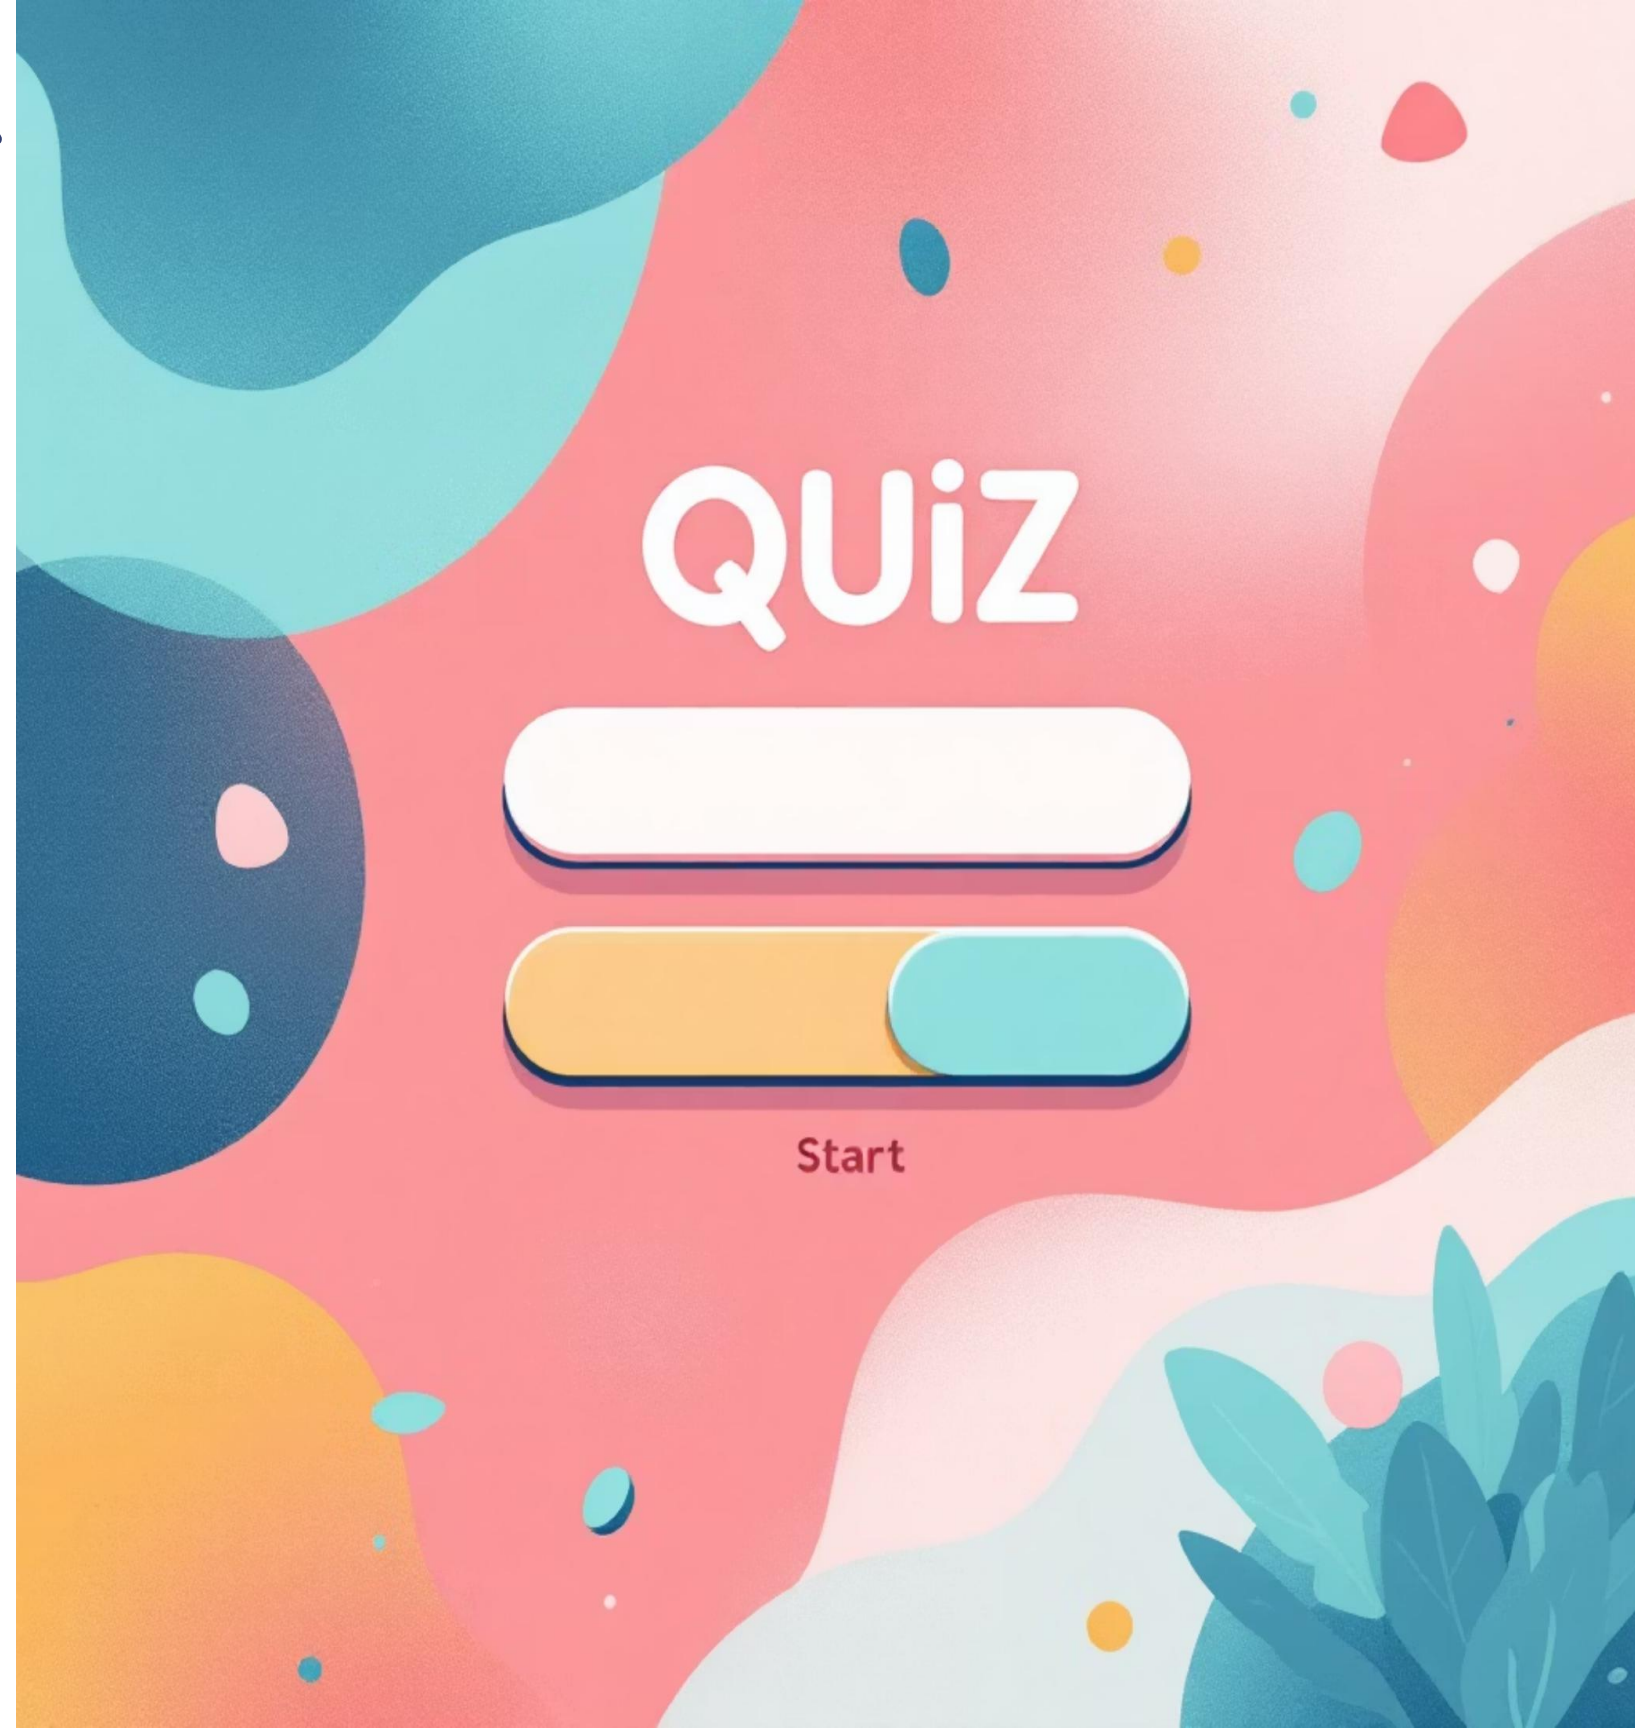

Team aligned on starting the Mini Quiz Game UI design work by 18th November, ensuring smooth transition between projects.

Daily Report – 17th November

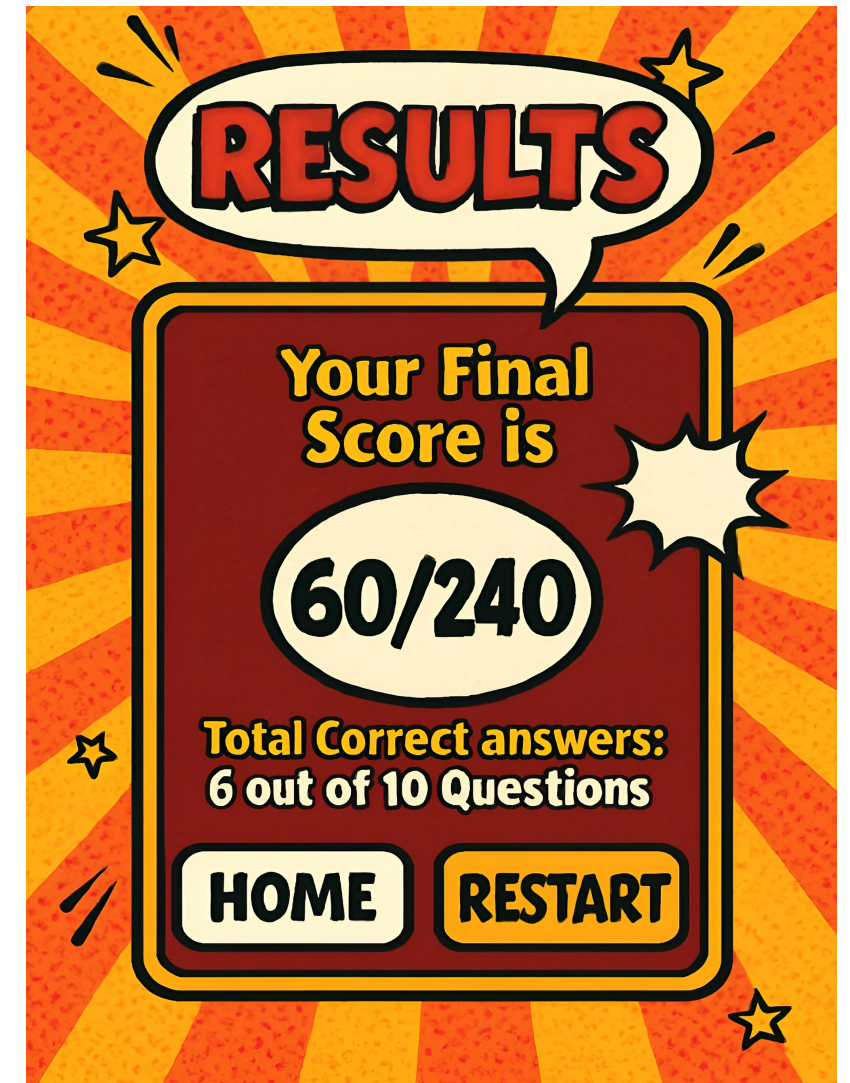

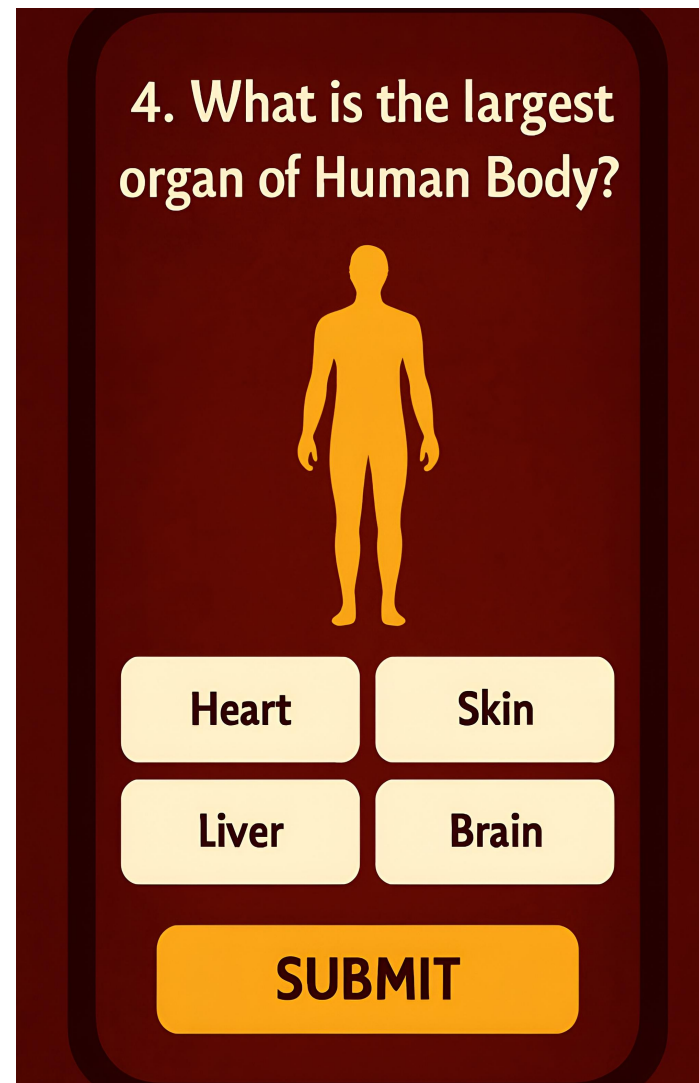

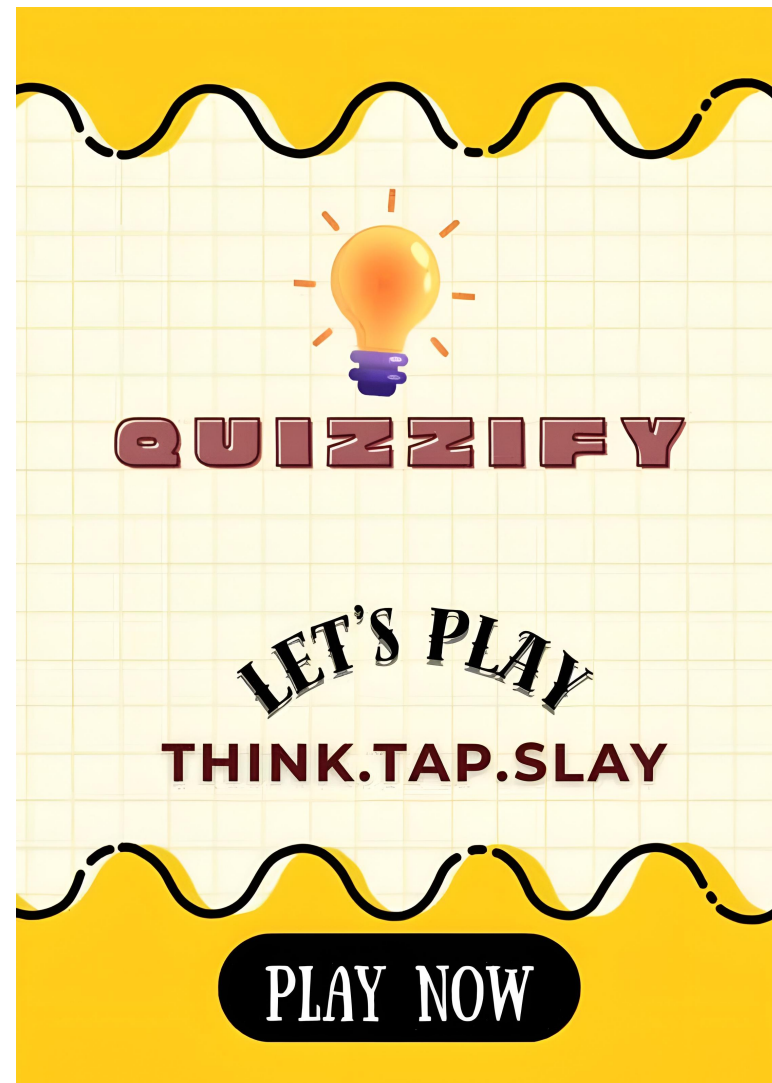

Quizzify UI Design Kickoff

The team began designing the complete user interface for Quizzify, our mini quiz game experience.

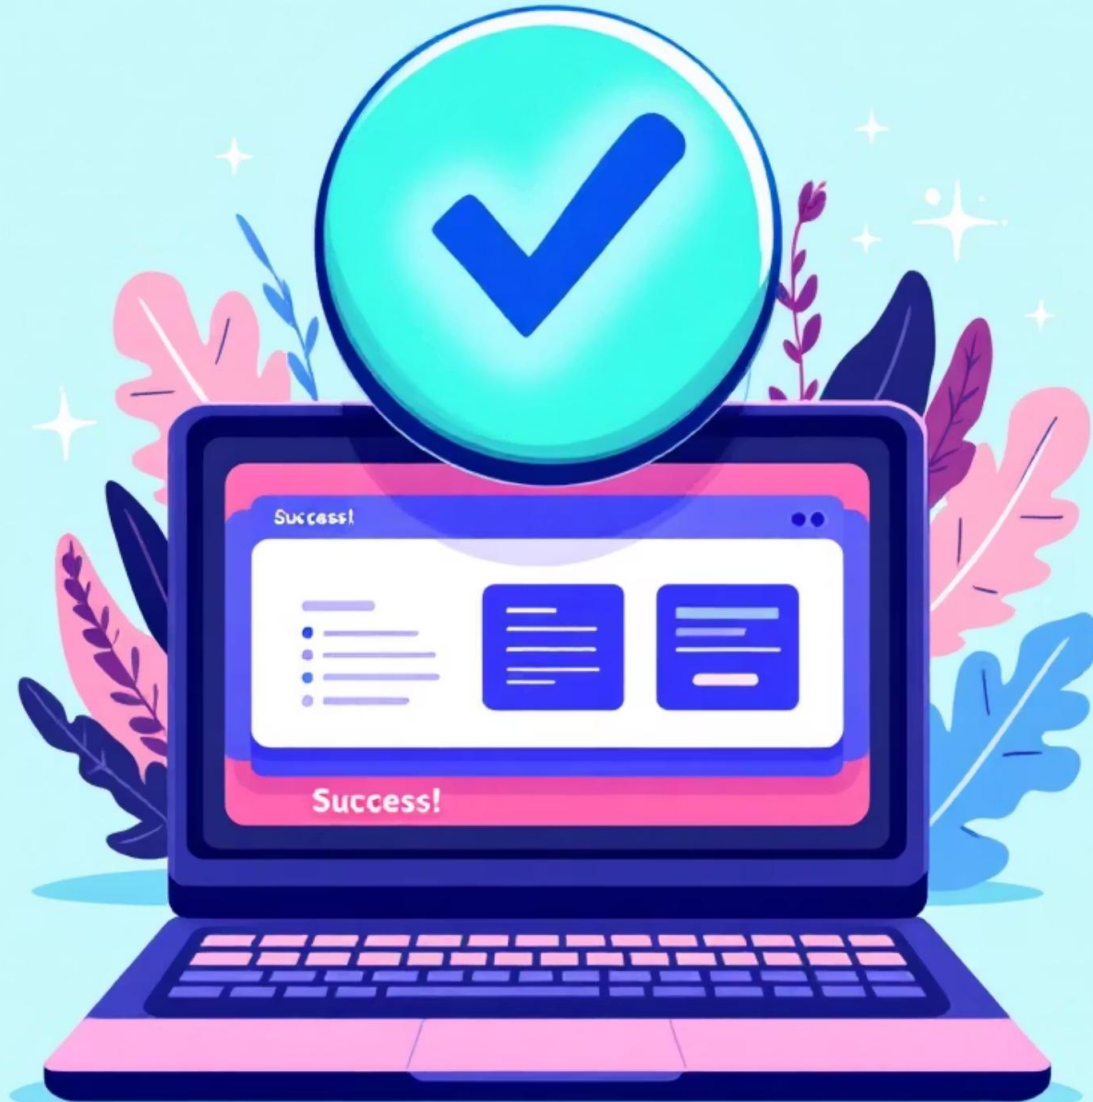

Focus areas included the start screen, question interface, and results display, all following our established design system.

Quizzify Game Screens

The Quizzify experience features three core screens: an inviting start screen, an intuitive question interface with clear answer choices, and a celebratory results display that encourages replay.

Daily Report – 18th November

Project Milestone Achieved

Project 2 reached substantial completion with all major features implemented and only minor refinements remaining.

Final Touches

Sanskriti completed all requested design changes and successfully submitted the finalized assets to the respective team groups for integration.

Project Status Summary

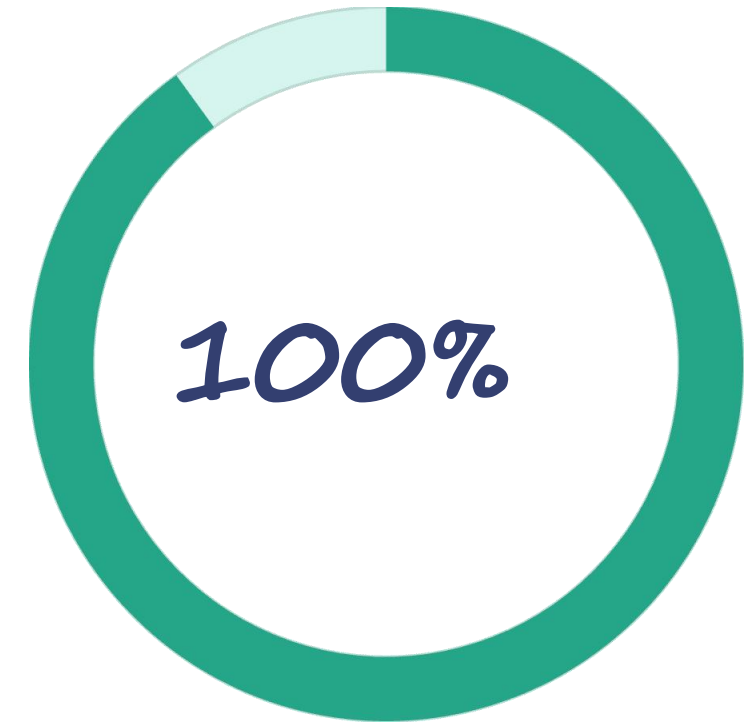

Mood Poll UI

Fully completed with emoji interface,
follow-up questions, and analytics
display

Quizzify Game

Almost finalized with all core screens
designed and minor adjustments
pending

Overall Progress

Ready for final review and integration
phase

Thank You

Project 2 showcases our team's commitment to creating thoughtful, user-centered experiences. Both the Mood Poll and Quizzify represent our dedication to clean design, intuitive interfaces, and meaningful interaction.
